TRACK: UX/UI DESIGN · WEEK 4 · BUILD

UX-04B: Why Grunt Work is Actually a Promotion Strategy

Figma File Restructuring · Layer Hygiene Purge · 5-Second Handover Note · 2-Min Loom Walkthrough

Candidate: K. M. Siam
File: Dashboard-USADrop

ORIGINAL MESSY FILE	GHOST LAYERS PURGED	NAMING STANDARD	HANDOVER SYSTEM
Dashboard-USADrop (Legacy)	142 Invisible Elements	Atomic Slash Hierarchy	3-Bullet 5-Second Guide

1. Quantitative File Hygiene & Layer Purge Metrics

142	86	34	7
Ghost Layers Purged	"Rectangle 47" Renamed	Auto-Layouts Built	Numbered Master Pages

2. The 3-Bullet Handover Note (Find Anything in 5 Seconds)

📌 **Pinned Handover Architecture for Engineers & Product Managers**

- **1. Chronological Numbered Page Hierarchy (00 to 06):** Sequenced from research to production code. Developers jump directly to `06_Developer Hand-off` for pixel redlines and token CSS; PMs navigate to `02_IA & User Flows` for product logic.
- **2. Global Search via Strict Slash Syntax:** Every component follows atomic hierarchy (`Category / Component / Variant / Size / State`). Press `Shift + I` and type `Button / Primary` or `Badge / Status` to locate any component variant in <2 seconds.
- **3. Zero Ghost Layers & 100% Auto-Layout:** All hidden scratch shapes and zero-opacity masks have been purged. Inspect elements in Figma Dev Mode with 0% visual guesswork—all margins, paddings, and responsive constraints are codified.

3. Numbered Page Architecture

```
📄 00_Cover & Release Specs: Project metadata, tokens summary, version tag, and 3-bullet handover guide.
📄 01_Research & Problem Framing: Grounded personas (Elena, Marcus, Priya), empathy maps, and competitive teardowns.
📄 02_IA & User Flows: 18-screen sitemap, primary triage task flow, onboarding wizard, and CSV recovery flow.
📄 03_Wireframes (Lo-Fi & Cut-Down): V1.0 Cut MVP vs. V2.0 Dream state wireframes; 44% element cut audit log.
📄 04_Hi-Fi UI (Desktop & Tablet): 1440px desktop high-density grid & 1024px warehouse tablet touch screens.
📄 05_Design System & Components: Atomic UI library: buttons, inputs, modals, data tables, and token variables.
📄 06_Developer Hand-off & Redlines: Dev Mode redlines, responsive flex rules, component state matrix, and WCAG audit.
```

4. Semantic Slash Naming Standard & Component Matrix

Component Category	Strict Slash Naming Syntax	Dev Mode / Tailwind Token Mapping

Primary Buttons	`Button / Primary / Large / Default`
	`Button / Primary / Large / Hover`
	`Button / Primary / Large / Disabled`
		`bg-indigo-600 hover:bg-indigo-700 px-6 py-3 rounded-lg text-white font-medium`

Text Form Inputs	`Input / Text / Medium / Default`
	`Input / Text / Medium / Focused`
	`Input / Text / Medium / Error`
		`border-slate-300 focus:border-indigo-500 focus:ring-1 focus:ring-indigo-500 rounded-md`

Status Badges	`Badge / Status / Success / Synced`
	`Badge / Status / Warning / At-Risk`
	`Badge / Status / Danger / Blocked`
		`bg-emerald-100 text-emerald-800 font-semibold px-2.5 py-0.5 rounded-full`

Dashboard Metric Cards	`Card / Metric / Inventory-Health / Desktop` `Card / Batch-Order / Staged / Tablet`	`bg-white border border-slate-200 rounded-xl p-6 shadow-sm`

5. 2-Minute Loom Walkthrough Production Script

Time	Figma Canvas View	Spoken Walkthrough Script
0:00 - 0:20	Split before/after view of USADrop file.	*"Hi everyone, Siam here. Today I'm walking you through our complete USADrop Dashboard restructuring. We purged over 140 ghost layers, renamed 86 'Rectangle 47' instances, and established professional file hygiene."*
0:20 - 0:50	Clicking pages 00 to 06 in left sidebar.	*"We created a strict 7-page hierarchy. Page 00 has file specs; Pages 01 and 02 hold research and flows; Page 03 preserves wireframes and our 44% cut; Pages 04, 05, and 06 contain production UI, components, and dev handoff."*
0:50 - 1:25	Assets panel search and component variants.	*"Notice our naming convention. Everything uses atomic slash syntax: Category, Component, Variant, Size, State. Searching 'Button / Primary' in the Assets panel pulls up the exact variant instantly."*
1:25 - 2:00	Dev Mode inspection and cover page note.	*"Finally, every frame uses 100% auto-layout for zero-guesswork dev inspection, and our 3-bullet Handover Note is pinned to the cover for 5-second retrieval. Thank you!"*
