TRACK: UX/UI DESIGN · WEEK 2 · FOUNDATIONS

# UX-02: Persona & Journey Map Fleshing

Grounded User Research Dossier · DeepSeek Extraction · Hallucination Audit

**Candidate:** K. M. Siam
**Project:** FlyCommerce OS

| PRIMARY RESEARCH BASE | ARCHETYPES FLESHED | JOURNEY CORE TASK | AI HALLUCINATIONS CORRECTED |
|---|---|---|---|
| 3 Verbatim Interviews | Founder, 3PL Ops, Merchandiser | Multi-Channel Stockout Crisis | 4 Critical Fabrications Fixed |

## 1. The 3-Persona Pack (Grounded Archetypes)

### Elena Rostova

The Scrappy Solo Founder · Botanica Glow (29)

> *"I spent 14 straight hours manually copying order IDs crying over my keyboard. I just need a screen that stops me selling products I can't deliver."*

**CONTEXT & TECH STACK**

- $1.4M ARR DTC Skincare; 8 SKUs.
- Shopify Plus, Amazon FBA, TikTok Shop, Sheets.

**GOALS**

- Prevent overselling during viral surges.
- Cut daily stock audit from 2.5h to 20m.

**FRUSTRATIONS**

- Channel stock sync lags up to 4 hours.
- Amazon rating penalization from backorders.

### Marcus Chen

Warehouse Ops Lead · Apex 3PL (34)

> *"If the UI doesn't work on a tablet with greasy fingers in a noisy warehouse, it's useless to my team."*

**CONTEXT & TECH STACK**

- Manages 42 pickers across 65,000 sq ft.
- Zebra Scanners, Rugged iPads, HighJump WMS.

**GOALS**

- Maintain 99.8% pick accuracy on floor.
- Zero floor halts from bad client CSV imports.

**FRUSTRATIONS**

- Trailing spaces in SKU codes crashing imports.
- Tiny unclickable buttons on mobile tablets.

### Priya Patel

Senior Demand Planner · Horizon Apparel (31)

> *"If an AI tool says 'Reorder 500 units', I will not click it without seeing the velocity formula... I revert to Excel."*

**CONTEXT & TECH STACK**

- $8.2M ARR Apparel; 140 SKUs overseas.
- NetSuite ERP, Looker, Excel PowerQuery.

**GOALS**

- 98.5% in-stock rate on top 20% core revenue SKUs.
- Reduce deadstock working capital by 15%.

**FRUSTRATIONS**

- Black-box automated recommendations.
- Unpredictable shipping delays (6 to 14 weeks).

## 2. AI First-Draft vs. Human Verification Log

All personas were verified against verbatim transcripts to identify and eliminate synthetic hallucinations.

| Area / Archetype | DeepSeek AI First-Draft | Verified Human Correction | Audit Rationale |
|---|---|---|---|
| **Elena Tech Stack** | Stated Elena uses enterprise "SAP ERP and Salesforce Commerce Cloud". | Corrected to: **Shopify Plus, TikTok Shop Seller Center, Amazon Seller Central, Google Sheets**. | Real small founders do not use $100k+ enterprise SAP. |
| **Marcus Hardware** | Suggested Marcus operates from a "MacBook Pro M3 Max at a standing desk". | Corrected to: **Ruggedized Zebra/Honeywell barcode scanners & cart-mounted iPads**. | Floor ops require touch-first ergonomics and industrial durability. |
| **Priya Quote** | Fabricated quote: *"I love automated one-click AI ordering because AI knows best."* | Corrected to: **"If an AI says 'Reorder 500 units', I will not click it without seeing the velocity formula."** | AI hallucinated enthusiasm; raw transcript proved high skepticism. |
| **Journey Curve** | Plotted a naive upward linear emotional progression from Stage 1 to Stage 6. | Corrected to: **Volatile curve plunging to -5 (acute panic during oversold viral events)**. | Real fulfillment crises cause severe anxiety |

| Area / Archetype | DeepSeek AI First-Draft | Verified Human Correction | Audit Rationale |
|---|---|---|---|
| | | | prior to resolution. |

## 3. Emotional Journey Map: Multi-Channel Stockout Crisis & Emergency Reroute

| Stage | Actions | Touchpoints | User Thoughts | Score | Pain Points | Design Opportunities |
|---|---|---|---|---|---|---|
| **1. Alert Trigger** | Receives urgent mobile push notification on stock deficit. | Mobile SMS, iOS Push, Smart Watch. | *"Is this a glitch or are we actually blowing through stock?"* | **-2 (Anxious)** | Alerts buried in notification spam. | Unified webhook push with high-priority audio chime. |
| **2. Assessment** | Opens laptop; compares Shopify, TikTok, and Amazon Seller tabs. | Chrome browser tabs, Google Sheets. | *"450 unfulfilled orders on TikTok! Amazon will suspend my account!"* | **-5 (Panic)** | Mismatched SKU codes across channels; manual calculations. | Universal SKU Aliasing Engine with live deficit tally. |
| **3. Triage** | Uses FlyCommerce OS to model cross-channel virtual inventory rebalance. | FlyCommerce OS Modal, XAI Formula Tooltip. | *"Show me the exact safety buffer math before I click confirm."* | **-1 (Cautious)** | Fear of black-box automated transfers. | **Explainable AI (XAI)** slider showing stock before/after impact. |
| **4. Warehouse Run** | Approves 200 unit reallocation; sends pick-wave to Marcus at 3PL. | Warehouse Cart Tablet, Zebra Scanner. | *"Marcus needs clean data before 5 PM cut-off. No errors."* | **+3 (Focused)** | Malformed CSV uploads causing floor work stoppages. | Pre-flight CSV data linter with 48px touch targets. |
| **5. Customer Care** | System triggers automated transactional emails with 10% coupon. | Klaviyo Email API, TikTok Messaging. | *"Keep buyers informed before they leave negative reviews."* | **+4 (Relieved)** | Generic cancellation messages sparking chargebacks. | Dynamic transactional delay notification templates. |
| **6. Prevention** | Priya configures automated dynamic safety buffers for TikTok surges. | FlyCommerce Rule Engine, Analytics. | *"We are never losing an entire weekend to inventory triage again."* | **+5 (Resilient)** | Manual rule management forgotten after crisis ends. | "One-Click Preventative Rule" suggested post-incident. |

## 4. "How to Use This" Guide for Product Managers

### Operational Implementation Framework for PMs & Engineering Sprints

**1. The Elena Test (Speed)**
Any core operational triage task must be executable in **under 3 clicks / 90 seconds**. Eliminate deep configuration submenus.

**2. The Marcus Test (Ergonomics)**
All warehouse UI components must have **minimum 48px touch targets** and pre-validated input sanitization to prevent floor freezes.

**3. The Priya Test (Transparency)**
No AI recommendation is displayed without an **Explainable AI breakdown** (Velocity + Lead Time + Buffer) and 1-click Excel export.
