TRACK: UX/UI DESIGN · WEEK 6 · BUILD+

UX-08: Interactive Prototype & Motion Architecture

3 Named Flow Starting Points · Smart Animate Spring Physics · Device Self-Testing Audit

Candidate: K. M. Siam
Project: FlyCommerce OS

FLOW STARTING POINTS	PRIMARY FLOW SPEED	MOTION ENGINE	TARGET DEVICES
3 Named User Journeys	4 Clicks / 22s Complete	Smart Animate Spring (250ms)	Desktop 1440px & Tablet 1024px

1. Three Named Prototype Flow Starting Points

Flow 1: Emergency Stockout Triage & Rebalance (Primary Flow)

Elena (Solo Founder)

`SCR-01 Grid` → `SCR-04 Triage` → `MOD-02 Overlay` → `Smart Animate Slider` → `BAN-01 Toast`

End-to-End Task: Taps amber `[ TRIAGE ]` badge on Vitamin C Serum → Opens centered modal overlay with 60% backdrop dimming → Snaps slider to 150 units with live numeric counter animation → Inspects XAI formula drawer → Commits buffer. Completes in **4 clicks / 22 seconds** with zero dead-ends.

Flow 2: Multi-Store Onboarding & SKU Auto-Mapping

First-Run Setup

`WIZ-01 OAuth` → `WIZ-02 Ingestion (1.2s)` → `WIZ-03 Conflict Resolver` → `SCR-01 Dashboard`

End-to-End Task: Connects Shopify, TikTok, and Amazon → Watches animated progress ingestion stepper → Reviews 4 conflicting SKU variants (`GLOW-01` vs `GLOW_01`) and applies 1-click auto-mapping → Launches calibrated dashboard.

Flow 3: Corrupted CSV Linting & Undo Rollback (Recovery Flow)

Marcus (3PL Ops)

`MOD-03 CSV Drop` → `MOD-04 Error Drawer` → `1-Click Auto-Clean` → `BAN-01 60s Undo`

End-to-End Task: Simulates upload of malformed CSV → Amber drawer highlights trailing spaces → Clicks `[ 1-Click Auto-Sanitize ]` → Dispatches clean pick manifest → Triggers floating 60s Undo Banner allowing instant state rollback.

2. Advanced Motion & Interaction Choreography

Interaction	Figma Trigger & Action	Motion Curve & Timing	Heuristic Payoff
Tactile Slider Quick-Snap	`On Click` [50%] → Swap Variant (325 Units)	**Smart Animate Spring:** Mass: 1, Stiff: 180, Damp: 24 (250ms)	Tactile physical weight; eliminates abrupt visual jumps.
Centered Modal Overlay	`On Click` [Rebalance] → Open Overlay MOD-02	**Ease-Out Quintic:** 300ms entry; 60% slate backdrop	Focuses 100% of attention on emergency triage (Von Restorff).
Explainable AI Drawer	`On Click` [ℹ️ XAI Math] → Expand Accordion	**Ease-In-Out Quadratic:** 180ms height transition	Progressive Disclosure; reveals formula without leaving modal.
Persistent 60s Undo Ring	`After Delay` (200ms) → Display Floating BAN-01	**Linear 60s Countdown:** SVG stroke offset ring	Eliminates fear of accidental commit; user control & freedom.

3. Multi-Device Self-Testing & Bug Fixes Log

Device Class	Interaction Breakdown Detected	Implemented Layout / Prototype Fix
Desktop (1440px)	Modal overlay was locked; clicking outside or pressing `Esc` failed to close, trapping the user.	Enabled **"Close when clicking outside"** and mapped keyboard shortcut `Esc` as an explicit overlay close trigger.
Tablet Touch (1024px)	Quick-snap pills were too thin (30px), causing finger mis-taps on the adjacent slider thumb.	Enlarged hit-boxes to **44px × 48px touch targets** with 8px thumb spacing (Fitts's Law).
All Viewports	The 60s Undo Toast rendered at bottom-right, colliding with the primary action button bar.	Re-anchored toast to floating **Bottom-Center (+24px offset)**, ensuring zero visual overlap with critical buttons.
