UX-10: Accessibility Audit & Design System Polish Pass

FlyRank UX/UI Track · Final Verification Sprint · FlyCommerce OS

WCAG 2.1 AA/AAA COMPLIANT

CANDIDATE	AUDIT SCOPE	REMEDIATION LEVEL	HAND-OFF PAGE
K. M. Siam	12 WCAG Checks · All Screens	Design System Tokens (0 Detach)	06_Developer Hand-off & Redlines

LOWEST TEXT CONTRAST	TOUCH TARGETS (FLOOR)	NON-COLOR SIGNALING	TOKEN-LEVEL FIXES
7.3 : 1	**54 px**	**100% Dual**	**5 Variables**
Exceeds 4.5:1 AA standard (AAA achieved)	Tablet actions enlarged from 32px to 54px	Shapes + Text paired with all color badges	Updated centrally; propagated to 15+ screens

1. Executive Summary & Purpose

Accessibility failures are the primary cause for enterprise SaaS procurement blocks and engineering sprint retro-fits. Correcting contrast ratios or keyboard traps directly in Figma design system variables costs minutes; remediating hard-coded CSS post-release costs entire engineering quarters. This pass conducts a rigorous 12-point WCAG 2.1 AA/AAA audit across all high-fidelity screens of FlyCommerce OS, resolves every failure at the root variable level, and executes a full design system polish sweep.

2. The Master Accessibility Audit Table (12 Rigorous Checks)

#	Inspection Target	WCAG Criterion	Initial Evaluation Finding	Token-Level Remediation / Design Fix	Ratio	Status
01	**Primary Text** text-primary on surface-card	1.4.3 Contrast Min (AA)	#0F172A on #FFFFFF. Crisp slate-900 on pure white canvas.	Retained token variable. Verified under light mode.	**16.1:1**	PASS AAA
02	**Secondary Text** text-secondary on surface-card	1.4.3 Contrast Min (AA)	#64748B on #FFFFFF yielded 4.4:1 (Marginal fail under AA threshold).	**Token Fix:** Darkened token to #475569 (Slate-600) centrally.	**7.3:1**	PASS AAA
03	**Table Header Text** text-tertiary on surface-subtle	1.4.3 Contrast Min (AA)	#94A3B8 on #F1F5F9 yielded 2.8:1 (Failed AA standard).	**Token Fix:** Remapped table headers to text-secondary (#475569).	**6.6:1**	PASS AAA
04	**Primary Action CTA** text-inverse on action-primary	1.4.3 Contrast Min (AA)	#FFFFFF on #4F46E5 (Indigo-600). High optical prominence.	Retained token. Added 2px offset border for keyboard navigation.	**8.4:1**	PASS AAA
05	**Warning Status Banner** feedback-warning-text	1.4.3 Contrast Min (AA)	Light yellow #F59E0B on #FEF3C7 yielded 2.1:1 (Failed AA).	**Token Fix:** Darkened text to #B45309 (Amber-700) on #FEF3C7.	**4.9:1**	PASS AA
06	**Dark Mode Card** text-primary on surface-card	1.4.3 Contrast Min (AA)	#F8FAFC on #161F30 (Deep navy slate card background).	Verified dark mode variable collection. Glare-free contrast.	**13.4:1**	PASS AAA
07	**Non-Color Statuses** Inventory Status Badges	1.4.1 Use of Color	Status conveyed solely by green, amber, red dots in tables.	**Design Fix:** Paired colors with Hexagon, Triangle, Square glyphs.	Glyph+Text	PASS AA
08	**Keyboard Focus Ring** Buttons, Inputs, Toggles	2.4.7 Focus Visible	Browser default blue outline was faint and clipped on cards.	**Token Fix:** Codified border-focus: 2px solid #6366F1 with 2px offset ring.	2px Ring	PASS AA
09	**Tablet Touch Targets** SCR-07 Warehouse Tablet	2.5.5 Target Size	Transfer action buttons were 32px height, prone to mis-taps.	**Layout Fix:** Enlarged primary touch target to 54px on tablet screens.	54px Target	PASS AAA
10	**Persistent Form Labels** Stock Rebalance Inputs	3.3.2 Labels or Instructions	One quantity field used placeholder text as label (vanishes on input).	**Design Fix:** Converted to persistent top label + input helper text.	Persistent	PASS AA
11	**Dedicated Error Space** CSV Import Modal Errors	3.3.1 Error Identification	Inline error text insertion pushed form layout down abruptly.	**Design Fix:** Reserved permanent 16px helper-text container below inputs.	Zero Shift	PASS AA
12	**Vestibular Motion** Drawer & Modal Transitions	2.3.3 Animation Interactions	Smart Animate spring curves could trigger vestibular discomfort.	**Token Fix:** Documented prefers-reduced-motion token (0ms instant cut).	0ms Cut	PASS AA

3. Token-Level Remediation & Non-Color Visual Signaling

Figma Variable Token Adjustments

Remediations applied directly inside FlyCore Design System Variables collection:

Variable Name	Pre-Audit	Post-Remediation
`text-secondary`	#64748B (4.4:1)	**#475569 (7.3:1 AAA)**
`text-table-header`	#94A3B8 (2.8:1)	**#475569 (6.6:1 AAA)**
`feedback-warning`	#F59E0B (2.1:1)	**#B45309 (4.9:1 AA)**
`border-focus`	1px #94A3B8	**2px #6366F1 + 2px offset**
`touch-target-tablet`	32px	**54px Touch Height**

WCAG 1.4.1 Dual-Signaling Architecture

Colorblind-safe multi-channel inventory status signifiers:

State	Color Fill	Geometric Shape	Plain-English Text
Synced	Green-100/700	**Hexagon + Checkmark (⬡)**	"SYNCED (0s lag)"
At Risk	Amber-100/700	**Triangle + Exclamation (△)**	"AT RISK (<24h stock)"
Blocked	Red-100/700	**Square + Cross (▢)**	"BLOCKED (Oversold)"
Transit	Blue-100/700	**Capsule + Arrows (⬭)**	"TRANSFERRING (In Transit)"

4. Full Consistency Sweep: Spacing, Typography & Radii

1. 8pt Spacing Grid
100% of auto-layout frames bound to 4px, 8px, 16px, 24px, 32px, 48px, 64px. Eliminated all odd-number margins.

2. Modular Typography
Major Third 1.250 modular scale enforced across 6 styles. Tabular numerals (tnum) enabled for numerical stock counters.

3. Geometric Corner Radii
Enforced 5 semantic tokens: 4px (Badges), 6px (Form Inputs), 8px (Buttons), 12px (Cards), 16px (Modals & Drawers).

4. Icon Bounding Boxes
Standardized 3 bounding tiers: 16px (Inline/Badges), 20px (Action Fields), 24px (Navigation Bar). Optical center aligned.

Deliverable Verification & Hand-Off Location:

The completed Accessibility Audit Matrix, Token Remediation Diff, and Polished Redlines are permanently published on Figma Page **06_Developer Hand-off & Redlines** in the master file:

Figma Master Project: FlyRank-UX-UI-Design-Capstone (Pristine Hand-off View) →
